What is Future Oceans₂?

Future Oceans₂ is the second Open Science Conference of the Integrated Marine Biosphere Research (IMBeR) project and will provide an opportunity to join world leading researchers to present advances in science from all disciplines that contribute towards –

ocean sustainability for the benefit of society: understanding, challenges, and solutions

In addition to delivering an update of the pertinent science, Future Oceans₂ will foster productive inter- and trans-disciplinary discussions and provide a forum to strategically map future research directions. Within this context, *Future Oceans₂* is based around three overlapping themes –

- Theme 1. Understanding and quantifying the state and variability of marine ecosystems;*
- Theme 2. Improving scenarios, predictions and projections of future ocean-human systems at multiple scales; and*
- Theme 3. Improving and achieving sustainable ocean governance.*

Future Oceans₂ will be an exciting mix of talks (plenary, keynote, research, and other - up to 10 concurrent sessions each day), posters, workshops, focus groups, world cafés, and other innovative formats to engage delegates. The conference will be preceded by two days of workshops.

When and where will Future Oceans₂ be held?

Future Oceans₂ will be held at Le Quartz Congress Centre in Brest, France from 17-21 June 2019.

We look forward to seeing you there. Abstract submission and registration are now open.
